CLEANROOM TENTS TO RENT

FAST AND RELIABLE

CLEANROOM TENTS YOU CAN ASSEMBLE YOURSELF

Our CleanFlowCell cleanroom tents are the perfect solution if you need to create a clean environment quickly and easily. Thanks to the high filter performance, cleanroom classes ISO 5–9 and GMP C and D can be achieved.

The rental tents are sent as a "plug and play" kit, can be erected by the customer and put into operation immediately.

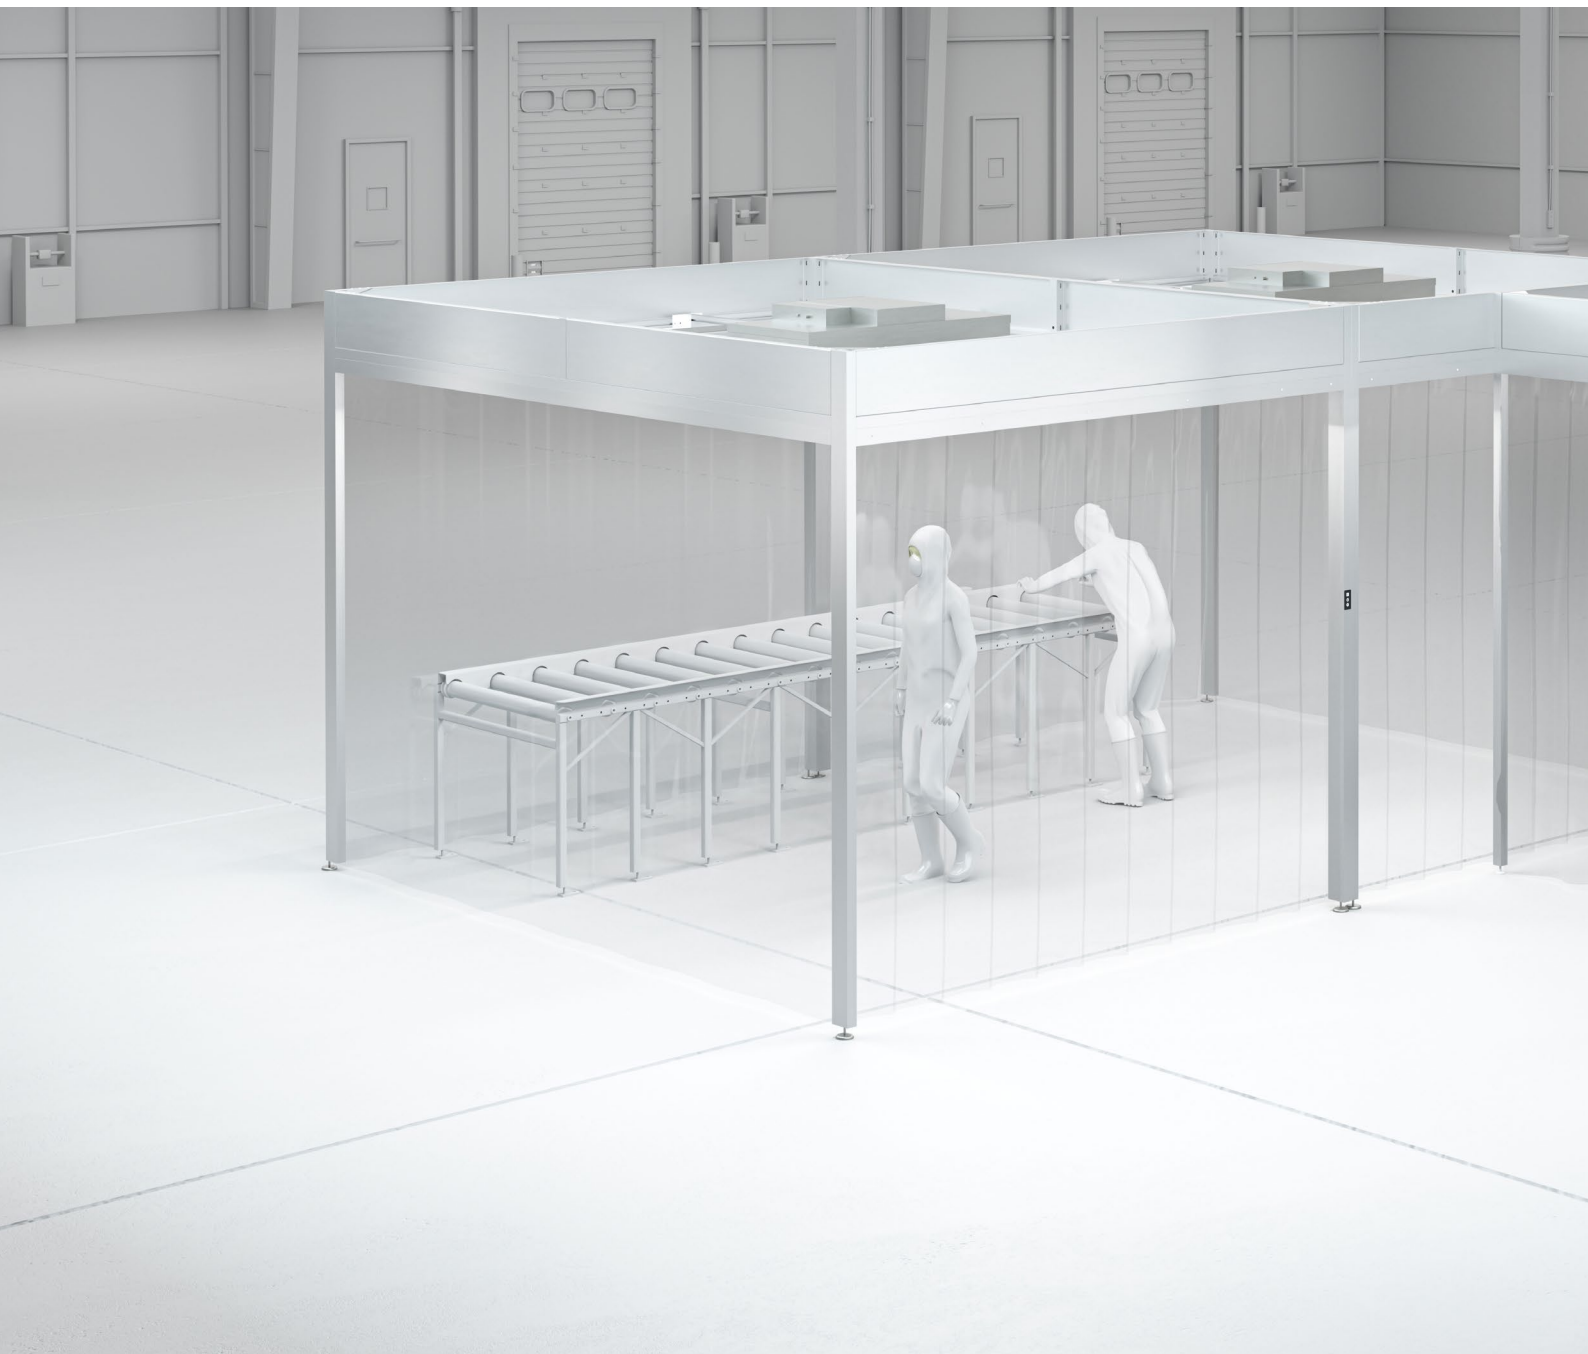

TEMPORARY SOLUTIONS

STAY FLEXIBLE AND RENT

If you only need a cleanroom for a short period of time, a rental tent is a good option. Renting can also make an investment decision easier for a test phase of cleanroom production; we offer you a purchase option after three months of use.

In addition to the monthly rent, fees for replacement of the main filters are charged. The number of installed filters can be taken from the table above. The price for a main filter is €1,033.26.

The costs of insurance and shipping, plus the costs of any necessary maintenance and repair of the tents after use, must be borne by the customer.

RANGE OF SIZES

MATCHED TO YOUR NEEDS

Our hire tents are available in three versions with different basic dimensions. If you need more space, individual tents can be easily assembled and flexibly combined.

For example, the small rental tent (variant 1) is ideal for use as an airlock.

The 5x3m cleanroom tent can also be hired with an integrated airlock (variant 3S).

«

For larger units, the rental tents can be connected to each other.
