Changing area equipment

Our furniture is functionally adapted to the requirements of air locks into cleanrooms. Narrow quarters, frequent changes of personnel and special hygienic requirements demand precise planning of the lock mechanism. Our furniture is adapted individually to the space available. Smooth, melamine resin-coated panels suitable for cleanrooms and the use of stainless steel permit easy cleaning, even with disinfectants. Smooth edges and solid design prevent hidden dust deposits that could lead to increased particulate emissions.

SCHILLING ENGINEERING – Custom solutions

- Clothing lockers
- Sitover benches
- Washbasins
- Dispensers
- Floor coverings
- Mats
- Material locks

SCHILLING ENGINEERING – functional and ergonomic

Cleanroom furniture

The strictest requirements for hygiene and lowest possible particle emissions aren't incompatible with the important requirements for workplace ergonomics and employee health. By using specific materials that prevent electrostatic charges and permit simple cleaning, ergonomic furniture is produced that meets cleanroom-specific requirements. We can also advise you in furnishing your cleanrooms and we manufacture special sizes that guarantee a custom functional and work-friendly process.

The complete product portfolio can be found on our Web site: www.SchillingEngineering.de

Cleanroom clothing

► REUSABLE CLOTHING

Different sizes and breathable materials ensure comfort and increased reliability in meeting the requirements of higher cleanroom classes. The materials used are washable, lint-free and anti-static. We would be happy to recommend a clothing concept tailored to your cleanroom. Of course, you can also request samples of any of our clothing with no obligation.

SCHILLING ENGINEERING – Convenience and Hygiene

Cleanroom clothing

► DISPOSABLE CLOTHING

The employees in cleanrooms are the largest source of undesired particles. A suitable clothing concept designed for each specific cleanroom class has a significant effect.

We would be happy to advise you in the selection of the right clothing. The use of disposable clothing can be safer and more cost-effective than reusable clothing. Ask about our prices!

- Coats
- Trousers
- Coveralls
- Hoods
- Facemasks
- Gloves
- Overshoes

Other accessories

The special production and work conditions in cleanrooms require the use of cleanroom-specific products. Our product portfolio offers a large selection of articles that simplify work processes and increase safety.
